CORE PROFICIENCIES

AI Training / RLHF	90%
Data Annotation	92%
Full-Stack Development	85%
Cybersecurity	75%

PROFESSIONAL PROFILE

Multi-domain technology professional with a BSc in Applied Computing and active experience across AI model training, data annotation, cybersecurity, robotics, and full-stack software development. On leading AI crowdsourcing platforms — Outlier AI, Appen, Remotasks, and Toloka — I have built a consistent record of high-quality annotation work across text, image, audio, code, and 3D lidar datasets, maintaining accuracy above platform quality thresholds throughout. I bring a software developer's precision to annotation: systematic, guideline-adherent, and quality-first.

🤖 AI TRAINING & DATA ANNOTATION EXPERIENCE

OUTLIER AI (SCALE AI) — 2025 – Present

AI Training Specialist — Freelance

Evaluated and ranked LLM outputs across coding, reasoning & creative tasks for RLHF pipelines.

- Performed side-by-side response comparison and preference ranking for LLM outputs across 200+ tasks.
- Wrote detailed quality annotations with justifications to strengthen model feedback loops.

Python / Scripting 80%

IoT / Robotics 65%

AI PLATFORMS

Outlier AI · Appen · Remotasks · Toloka AI · Scale AI · Argilla

ANNOTATION TOOLS

CVAT · Label Studio · Labelbox · Roboflow · Prodigy

SECURITY TOOLS

Kali Linux · Wireshark · Burp Suite · Nmap · Metasploit

DEV STACK

Python · JavaScript · React · Node.js · HTML/CSS · MySQL · Firebase · Git · Figma

EDUCATION

BSc Applied Computing

University — Kenya

Software Engineering · Databases · Networking · Cybersecurity · HCI · Mobile Dev

- Reviewed AI-generated code (Python, JS) for correctness, efficiency, and security practices.
- Flagged harmful, biased, and factually incorrect outputs following safety annotation guidelines.

Platforms: Outlier AI interface · RLHF ranking tools · Scale AI tasking portal

---

APPEN 2024 – Present

Data Annotator & AI Trainer — Freelance

Completed diverse AI data projects across search relevance, image labeling, NLP, and conversational AI.

- Rated search engine result relevance for multiple locales, scoring above acceptance threshold consistently.
- Annotated images with bounding boxes and classification labels for computer vision datasets.
- Evaluated chatbot and virtual assistant responses for naturalness, helpfulness, and accuracy.
- Transcribed and quality-checked audio recordings for speech recognition model improvement.

Platforms: Appen Connect · Figure Eight annotation tools

REMOTASKS (SCALE AI) 2024 – Present

AI Data Specialist — Freelance

High-volume 3D lidar, image segmentation & lane detection annotation for autonomous systems.

- Labeled 3D lidar point clouds with semantic segmentation for autonomous vehicle perception models.
- Drew polygon and cuboid annotations on camera images for object detection pipelines.
- Completed lane detection, traffic sign, and pedestrian annotation tasks for self-driving datasets.
- Achieved Bronze and Silver proficiency certifications across multiple annotation task types.

Platforms: Remotasks · Scale AI 3D/2D annotation tools · lidar labeling UIs

---

TOLOKA AI (YANDEX) 2023 – Present

Crowdsourcing Annotator — Freelance

Global AI dataset contributions — image classification, text categorization, and search relevance.

CERTIFICATIONS

- Remotasks Bronze & Silver Proficiency (2D, 3D annotation)
- Outlier AI — Active AI Training Specialist
- Appen Connect — Maintained Quality Scores
- Cybersecurity: TryHackMe, OWASP self-directed study
- Google IT Support (coursework equivalent)

LANGUAGES

English — Fluent

Swahili — Native

AFFILIATION

Flawless Consulting Consortium Limited — Technology Contributor

- Classified images into predefined categories for computer vision classification model training.
- Assessed web page quality and relevance for search engine improvement datasets.
- Maintained consistently high acceptance rates through disciplined guideline adherence.

Platforms: Toloka platform · quality-control pool management

💻 SOFTWARE & IT EXPERIENCE

MINISTRY OF EDUCATION

Oct 2025 – Present

DLP Intern

- Developed and maintained software dashboards for education management and data reporting.
- Improved data entry and validation processes — reducing inconsistencies across ministry systems.
- Applied data protection, access control, and confidentiality principles to system workflows.

LUKENYA COLLEGE

Sep 2024 – Nov 2025

ICT Tutor

- Delivered sessions in programming, networking, and cybersecurity to diverse student groups.
- Introduced AI fundamentals and data annotation concepts to prepare students for tech careers.
- Guided capstone projects from problem definition through design, development, and presentation.

AVITECH INTERNET SOLUTIONS

Jan – May 2024

Customer Service Agent

- Handled user inquiries across phone, email, and live chat with high accuracy and professionalism.
- Logged and categorized issues systematically — skills directly applicable to annotation QA.

CHAGGO MILLING PLANT

Jun – Dec 2023

IT Support Staff

- Digitized manual record workflows using templates and automation scripts, cutting reporting time.

- Maintained local networking, system security, backups, and printer infrastructure.

SELECTED PROJECTS

🤖 AI Prompt Evaluation & RLHF Dataset

Evaluation framework for comparing LLM outputs — scoring accuracy, helpfulness, and safety. Produced structured RLHF preference datasets for fine-tuning workflows.

🏷️ Image Classification Dataset Pipeline

End-to-end annotation pipeline using CVAT & Label Studio — multi-class image dataset with bounding boxes and segmentation masks for computer vision training.

🔐 Network Security Audit Tool

Python port scanner and vulnerability reporter with banner grabbing and structured security reports — tested on controlled lab environments.

🦾 IoT Sensor Monitoring Dashboard

Real-time web dashboard for Arduino sensor data — temperature, humidity, motion — with alert thresholds and CSV data logging.

💻 Digital Water Management Platform

Full-stack platform for water service delivery, monitoring, payment flows, and role-based access — aligned with NGO and institutional needs.
